

## Le Mans Brake Booster Kit

AWP038

**£895.00**

**£1074.00 inc VAT**

### Product Description:

Le Mans Brake Booster Kit

As the original brake servos for these cars are no longer available, we have designed a suitable replacement kit of servos and mounting brackets. The servos that we have chosen for our kit are of an increased brake boost ratio but of physical dimensions similar to the original specification. This increase in brake boost ratio greatly improves both the breaking quality and the safety factor when driving on modern roads. The initial response, from customers with this brake booster kit fitted, has been one of praise and satisfaction.

The LE MANS BRAKE BOOSTER KIT consists of:

A pair of matched brake servos

A pair of servo mounting brackets

A pair of servo support brackets. Suitable for Aston Martin DB5 & DB6

BOOST RATIO 4.25:1
