PORTFOLIO OF DREAMS

Presenting the most significant Aston Martin photographic book ever produced

Available to purchase NOW AT ONLY 90!

While stocks last so hurry at this one off offer price. When Tim Wallace began photographing Aston Martins for Aston Workshop just 10 years ago, little did he imagine it would lead to what is now considered by many to be the most significant Aston Martin photographic coffee table book ever produced.

This incredible large scale, heavyweight book features some of the finest Aston Martin photography ever assembled. From the very first A3 of 1921 to the most recent DB11, the book covers every major model as well as some of the worlds rarest and most valuable Astons.

Many technical books have been written about Aston Martin and the companys history but the emphasis here is on the beauty of these intoxicating chariots as seen through the lens of Tim and other leading automotive photographers.

A 634 page masterpiece weighing in at 5.8 kilos and with a foreword by Sir Stirling Moss, this stunning book is sure to become as collectable as the cars it portrays. 199.95 plus p+p where applicable
