

CSI PROgrammable distributor

CSI-PRO-M23D-AM

£370.55
£444.66 inc VAT

Product Description:

CSI PROgrammable distributor
DB4-DB5-DB6-DBS

The CSI Pro Ignition is a programmable distributor for your classic Aston Martin. You can adjust and program the advance curves yourself.

In addition to the PRO distributor, you need the CSI-PRO-BLUE (iOS/Android) or the CSI-PRO-USB (Windows) programming module/cable.

Two selectable presets (modes) can be programmed, each with its own rpm and vacuum curve.

Plus various other settings such as speed limiter, maximum total advance and minimum rpm speed for activating the vacuum advance.

Key features:
Edit and write curves even while the engine is running.
Two switchable preset modes for curves and settings.
Vacuum effect visible on the total advance gauge.
Connectable with USB module for Windows computers.
Connectable with wireless module for Android and iOS smartphones.
Immobilizer function on the smartphone.
Smiths style Dashboard; real life data.
Lucas' style; 23D, 25D, 43D, 45D, 59D, 35D8

PLEASE NOTE AN ADDITIONAL CABLE OR BLUETOOTH MODULE IS REQUIRED FOR THIS ITEM. SEE BELOW.
