

## DOOR SEAL PRE BONDED MITRE

692364AW

**£199.00**  
**£238.80 inc VAT**

### Product Description:

New to range and only available from Aston Workshop.

These door seals have been developed in conjunction with a trusted supplier so that they have a pre bonded factory mitre which eliminates the problem of attempting to bond the door seal at the 90 degree joint as per OE supplied seals.

Often these joints deteriorate over time, allowing water ingress and need re bonding which is a difficult process and often gives a sub standard look to your cherished Aston Martin.

These door seals are sold individually, but we recommend they are fitted in pairs and are suitable for DB4,5,6, DBS and V8 models.

Images for illustration purposes - only one door seal supplied.
